Problems with a local database

- No support for handheld or tablet devices
- Performance problems on large databases

Key benefits

- We convert your MS-Access application to a browser based web application that can be accessed from anywhere on any device

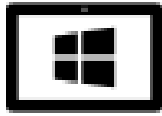

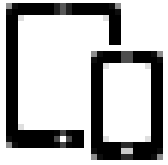

Key benefits

- We also convert all your existing data to a Microsoft SQL server
- Your Forms, Reports, Export will be converted one to one in a new modern design
- Your new web application can be hosted in the Cloud or in your local environment
- You can control the users access to the database with our standard user rights assignments (login etc.)
