11 May 2017 Antrow is attending Microsoft Build 2017 in Seattle

We are happy to be a part of the Microsoft Build 2017 conference in Seattle, we are learning about new exiting technologies that can benefit our customer and of the new era of intelligent cloud, artificial intelligence and serverless computing.

We at Antrow are seeing a clear tendency that we're moving from a world of single devices to a world of multiple devices and IoT devices and all our software solutions are built to support this new exciting digital world.

Antrow is offering a wide range of cloud services ranging from artificial intelligence, machine learning, hosting and storage, and are happy to provide our customer with the latest technologies to bring you the competitive edge.
