

COMFORT DISPLAY®

CENTRAL CONTENT CONTROL OF DIGITAL SIGNAGE MONITORS

Inform customers inexpensive and easy

The Comfort display solution developed by Antrow software is a content management and playlist software to control and wireless distribute content and playlist to in-store displays and digital signage monitors (regardless of location).

With the online COMFORT DISPLAY client the user manages the playing content centrally such as Images, text, film / video, MS Office™ documents, Adobe™ documents and many others slide types. With the playlist editor the user can easy upload and edit your presentations and schedule presentation and playlist up to 5 years in advance.

From the COMFORT DISPLAY client the user can publish content via Wi-Fi / WLAN / UMTS or over the IT corporate network to any device on which an IOS (Apple™), Windows™, SMART TV™, Linux™ or Android™ operating system is installed and connected to the internet.

The COMFORT DISPLAY client for controlling the displays can be operated on Apple, Windows PCs, Linux PC, tablet or smartphone.

The COMFORT DISPLAY® server can be installed locally or hosted inexpensively as cloud service (SaaS).

Optionally this solution can also be connected to common EPR systems such as Hiltes® Wincash, SAP® or Navision® .

DIGITAL SIGNAGE

Central CMS system to control the content and playlist of up to 99999 digital signage monitor

The content can be played on any Windows/Apple/Android /Linux device

Scheduled content playlist
